

Meet Our Customer

Wellness is a journey, not a destination.

The team at Infinity Wellness Center Chiropractic & Acupuncture is dedicated to guiding you on that journey in order to improve your overall quality of life. Offering an all-encompassing spectrum of treatment options, Drs Matt Johnson, Lindsey Johnson and Tyler Johnson provide a unique service to their patients that results in relief from a broad range of ailments.

Formerly Global Health Chiropractic North, Infinity Wellness “realigned” itself in January 2013, and now focuses on providing all-inclusive wellness options for the whole family. It may surprise you to discover how many common health issues can be relieved, or even cured, by the non-invasive treatments offered at Infinity Wellness.

Dr. Matt specializes in pregnancy and pediatric chiropractics. Studies show fewer cases of ear infections, allergies, tonsillitis and even asthma in children under chiropractic care as opposed to those without. He even adjusted his and Dr. Lindsey’s son, Jace, within minutes after he was born!

Dr. Lindsey’s specialty, in addition to chiropractic, is acupuncture. Don’t let a fear of needles deter you from this practice that is a proven treatment option for the following: Bells Palsy, allergies, migraines, sinus troubles, and even snoring and infertility!

Dr. Tyler is the team chiropractor for Texas Tech Softball and one of only three chiropractors in Texas who specializes in Advance Muscle Integration Technique, or, A.M.I.T. When a muscle gets overworked, the body will naturally “shut it down” inhibiting its performance. A.M.I.T. treatments help restore those muscles to their former functionality which results in less pain and inflammation and increased performance.

In addition to Infinity Wellness, Drs. Matt, Lindsey and Tyler are all personal customers of LNB. They are pictured at right with Jerry Vance, who is even one of their A.M.I.T. patients.
